Summary Report of Remedial Classes Conducted in AY 2014-15 Sem2

The objective of remedial teaching is to give additional help to students who, for one reason or another, have failed to clear subjects along with the rest of the class.

GRIET ECE Department has conducted remedial classes to students with faculty who are experts in the particular subjects. The students were intimated about remedial classes through a phone call/message from their respective mentor. Expert subjective faculty will provide tips as well as study material for them which would be useful for them to clear the exam. Around 75-80% of students who have attended got benefitted and they passed in the exams

The classes are aimed to help the students who are having a maximum of three backlogs so that they will get the degree as per the academic calendar. Final Year Students preferred material and few tips from subject experts as they were busy in Projects for some subjects they have attended they have attended the classes

The sessions for II and III Year subjects are conducted to prevent failure rate and thereby increasing transition rate. The subjects are selected based on II Semester results. To increase attendance for the classes a brief motivation lecture is organized with the key note address by HOD. The following table shows the courses for which Remedial Classes were held for the AY 2014-15 and the Transition rate in such course is as follows:

		2014-15(Sem II)		
S.No	Course	No of students attended	No of students Passed	Transition rate
1	MC	36	26	72.22
2	AC	50	38	76
3	AWP	22	16	72.72

The ultimate aim of remedial teaching is to help pupils who have fallen behind to learn to the best of their ability and to bring them back into the mainstream classes as far as possible.

Faculty Report

Subject: Analog Communication

I

Unit 1: Discussed on amplitude modulation

Unit 2: Discussed SSBSC & VSBSC AM

Unit 3: Discussed on angle modulation

Unit 4: Discussed effects of noise in communication

Unit 5: Explained pulse modulation techniques

ANTENNAS AND WAVE PROPAGATION

Unit 1: Discussed about the antenna parameters Gain, Directivity, Effective Aperture, Radiation patterns.

Unit 2: Importance of arrays, Different types of arrays –Broadside and End Fire arrays.

Unit 3: discussed about rhombic, yagiuda antennas

Unit 4:discussed about slot, horn, parabolic reflector

Unit 5: critical frequency, skip distance, max. usable frequency, Layers in ionospheric propagation.

Faculty Report on Microcontrollers

Unit1.

Discussed the architecture and pin diagram of 8086

Unit2

Explained 8051 features ,architecture,pin diagram

Unit3

Explained addressing modes and programming of 8051

Unit4

Explained timer programming,serial programming etc

Unit5

Explained various applications and interfacing to 8051

Analog Communications

Micro controllers
