

GRIET/PRIN/15B/G/17-18

15 March 2018

GOKARAJU RANGARAJU INSTITUTE OF ENGINEERING & TECHNOLOGY

REMEDIAL CLASSES 2017-18

CIRCULAR

FINISHING SCHOOL

This is to inform you all that Remedial Classes will be held for academically weak students from 22 March 2018. List of students and time tables are send to individual departments.

V N Ramadani
Dean Finishing School

Summary Report of Remedial Classes Conducted in AY 2017-18 Sem1

The objective of remedial teaching is to give additional help to students who, for one reason or another, have failed to clear subjects along with the rest of the class.

GRIET ECE Department has conducted remedial classes to students with faculty who are experts in the particular subjects. The students were intimated about remedial classes through a phone call/message from their respective mentor. Expert subjective faculty will provide tips as well as study material for them which would be useful for them to clear the exam. Around 65-75% of students who have attended got benefitted and they passed in the exams

The classes are aimed to help the students who are having a maximum of three backlogs so that they will get the degree as per the academic calendar. Final Year Students preferred material and few tips from subject experts as they were busy in Projects for some subjects they have attended they have attended the classes

The sessions for II and III Year subjects are conducted to prevent failure rate and thereby increasing transition rate. The subjects are selected based on I Semester results. To increase attendance for the classes a brief motivation lecture is organized with the key note address by HOD. The following table shows the courses for which Remedial Classes were held for the AY 2017-18 and the Transition rate in such course is as follows:

		2017-18(Sem I)		
S.No	Course	No of students attended	No of students Passed	Transition rate
1	PTSP	94	75	79.78
2	Signals & Systems	87	73	83.9
3	AWP	80	69	86.25

The ultimate aim of remedial teaching is to help pupils who have fallen behind to learn to the best of their ability and to bring them back into the mainstream classes as far as possible.

ANTENNAS AND WAVE PROPAGATION

Unit 1: Discussed about the antenna parameters Gain, Directivity, Effective Aperture, Radiation patterns.

Unit 2: Importance of arrays, Different types of arrays –Broadside and End Fire arrays.

Unit 3: discussed about rhombic, yagiuda antennas

Unit 4:discussed about slot, horn, parabolic reflector

Unit 5: critical frequency, skip distance, max. usable frequency, Layers in ionospheric propagation.

Faculty Report on PTSP

Unit1. Explained Probability and Random Variable

Unit2.Explained Probability of Single Random variable

Unit3. Explained Probability of Multiple Variable Random variable

Unit4. Explained Random Process.

Unit5. Explained Modeling of Noise.

Faculty Report

Subject: Signals & Systems

Unit 1: Discussed on signals and systems classification and properties

Unit 2: Solved Fourier series, Transforms & Laplace transform problems

Unit 3: Discussed on characterization of LTI systems

Unit 4: Discussed Sampling and aliasing concepts

Unit 5: Discussed Digital signals and Z-transform

Signals & Systems
